MAIN PROJECTS

Zeatool and Zeamed
- In this initiative, we've focused on enhancing healthcare services, aiming to offer users the highest quality treatments at the lowest possible costs, while also finding facilities close to their locations and utilizing their insurance plans to ensure they receive the appropriate care without any hassle.

Metaverse
- A Project Based on Virtual Reality in Angular, which uses Unity features to give us a 3D virtual platform to communicate with their Client and User,
- I have also implemented Agora premium features for communication with screen sharing, and video calling.

Axxya Nutritionist Pro
- Application is used for Provide Nutritious solutions and benifits, with proper diet guidance in required nutritions, based on different country. It's a highly scalable project, with high code quality.

Daily Objects
- This is an e-commerce Application, I have deployed this application in EC2 AWS platform and also used Cognito for user Authentication

Jewelex- Diamond Heaven
- Another Ecommerce Website in MEAN Stack, I have worked on NodeJs as a backend developer, it's a very optimized project, and worked on build, test, deployment, and support
