

SOM DURGESH GUPTA

Full Stack Software Developer

MEAN MERN & AWS *(Immediate Joiner)*

- Maa Durga Dressed,
Main Road, Near Bus Stand,
Dist-Mauganj, (M.P).
- +91 7987299768
- somdurgeshgupta@gmail.com

Results-driven Full Stack Developer with 5.5 years of experience building scalable web applications using the MEAN stack (MongoDB, Express.js, Angular, Node.js). Skilled in using AI tools to improve development speed and code quality, designing RESTful APIs, and deploying cloud-native applications on AWS. Experienced in agile environments, delivering secure and high-performance user-focused solutions.

SKILLS

Technical Skills

- Angular (10, 12, 14 & 18), React, Typescript, MEAN stack, Node Js, Codex, Cloude AI,
- AWS(EC2, Cognito, CodeStar, Code Commit, Lambda serverless, Lightsail, Amplify, IAM)

EDUCATION

Bachelors of Computer Science & Technology | IBM-BDA

2016 – 2020

JK Lakshmipat University | Computer Science and Big Data Analytics

INTERNSHIP

Firky Wholesale Pvt. Ltd. (Daily Objects)

Jan 2020 – May 2020

- Created an e-commerce application deployed in EC2 AWS.
- Used Cognito for user Authentication.

OTHER

- **Certified:** Professional Engineer
- **Languages:** English, Hindi
- **Interests:** Basketball,
- Coding & Learning Technologies.

WORK EXPERIENCE

► Senior Software Developer | Tuple Technologies Pvt Ltd.

Sep 2025 – Present

- Engineered scalable web applications, achieving 95%+ on-time delivery and strong client satisfaction.
- Built Angular (v20/18) & Node.js apps supporting 10k+ users, significantly reducing load time.
- Developed AI-driven features to enhance user insights, engagement, and decision-making.
- Delivered a franchise investment platform for exploring, comparing, and simplifying fractional investments.

► Full Stack Web Developer | Arahast Technologies (Client - Airtel)

Mar2025 – Aug 2025

- Project: Dashboard Application for Project & Cost Visualization.
 - Built a full-stack dashboard using Angular and Node.js to visualize project and resource data Angular (v14, 16).
 - Designed and optimized database architecture to efficiently handle large datasets with high responsiveness.
 - Integrated dynamic charts and graphical views for real-time insights into project status and cost management.
- Delivered a scalable, high-performance solution to support data-driven decisionmaking.

► Full Stack Software Developer | SHC Technologies Pvt Ltd.

Dec2023–Aug 2024

- Engineered scalable, custom web applications aligned with business goals across multiple domains.
- Delivered 95%+ projects on time, adapting efficiently to changing client requirements and priorities.
- Built high-performance, responsive apps using Angular (v10/12) and Node.js, improving performance by ~30%.
- Integrated AI-driven features and optimized code quality, enhancing user experience and ensuring reliable, high-quality outcomes.

► Software Engineer | Q3 Technologies Pvt Ltd.

Apr 2021 – Sep 2023

- Contributed to building a nutrition management system aligned with global food compliance standards.
- Engineered backend APIs for an e-commerce diamond platform, improving transaction security and payment processing efficiency.
- Maintained and enhanced Java backend systems for real-time production environments.
- Strengthened application security by implementing authentication and access control mechanisms.
- Leveraged cloud services (AWS) to deploy and manage scalable applications.

PROJECTS

► Airtel I Deploy Dashboard

- Dashboard Application for Project & Cost Visualization – Airtel Corporate Office, Gurugram
 - Built a full-stack dashboard application using Angular and Node.js to visualize project data, resource allocation, and cost management for Airtel's internal operations. Designed optimized database architecture to efficiently handle large datasets, integrated interactive charts for Real-time insights, and led end-to-end delivery—from planning to deployment—ensuring a scalable, high-performance solution aligned with client expectations.
 - application.
- Design & UI Updates, Added new features for user experience in their program.

► Monarch

- A highly valuable project, based on the Crypto Exchange platform.
- I have updated the frontend on Nuxt JS application.
- Design & UI Updates, Added new features for user experience in their program.

► Zeatool and Zeamed

- In this initiative, we've focused on enhancing healthcare services.
- Improved treatment quality by {15%} while reducing costs by {20%} through optimized healthcare service delivery.
- I have created the fronted UI Design and updated the Backend User Authentication Program.
- Finding facilities close to their locations and utilizing their insurance plans.

► Axxya Nutritionist Pro

- Developed a highly scalable application with a strong focus on high code quality.
- The application offers nutritious solutions and personalized diet guidance tailored to different countries.
- Implemented MongoDB and Node.js to manage and update nutrition information for users efficiently.
- Contributed to the Axxaya application, specifically working on country-specific data for the US and Canada.

► Jewelex- Diamond Heaven

- Developed an e-commerce website using the MEAN Stack, ensuring scalability and efficiency.
- Enhanced the backend architecture in Node.js, improving code quality and optimizing backend services.
- Refined the frontend design in Angular, ensuring a seamless user experience.
- Deployed the application on AWS EC2, ensuring high availability and performance.
- Optimized the entire development lifecycle, including build, testing, deployment, and support.
